One World Pediatrics

Making a world of difference for children of all abilities

To all of our Parents and Caregivers.....

On April 15, 2020, the American Academy of Pediatrics advised that Pediatricians and parents should no longer put off checkups, vaccines or chronic care. COVID-19 has changed medical practice as we once knew it, but we should still do the very best for our children. Continuing to offer quality care in these times is the best way to do that.

We at the One World Center for Autism are forging ahead and offering a new way to provide care. As of May 18, 2020, we are fully launching telehealth Primary Care and Autism Diagnostic Services conducted by using 2-way audio video technology. The platform is different, but the goal is the same—to provide a medical home for you and your child that offers ongoing support and quality service.

Our leaders agree. We cannot afford to wait any longer. Deferring routine visits, delays preventive services, early diagnosis and intervention, as well as expert medical guidance and counsel, all of which are critical for future good health. If we want to prevent disease and maintain health and safety, let's work together by creating new ways to connect for the sake of our children and our communities.

Call for a telehealth appointment today!

Phone: 301-618-8395

Office hours: 10 am-4 pm Mon, Tues, Thurs, Fri (closed Wednesday)

After hours: 5 pm-9 am (General Pediatric urgent calls only)
